

## NEWS RELEASE

December 4, 2012

Trading Symbol: BDG – (TSX.V)

**Vancouver, British Columbia** – Bulldog Explorations Ltd. [formerly SinoGas West Inc.] (the “Company” or “Bulldog”). Further to the Company’s News Release dated June 28, 2012, the Company is pleased to announce the results of a 649.3 m diamond drilling program that was carried out on the Eagle Lake Property at the Red October Showing during July 2012.

The exploration work program, which mainly consisted of diamond drilling, was conducted on behalf of the Company by Terralogic Exploration Services, a subsidiary of Eagle Plains Resources Ltd. (“Eagle Plains”). The 2012 work program was under the supervision of Jarrod Brown, P.Geo., hereby identified as the “Qualified Person” under N.I. 43-101.

The diamond drilling program was designed to test a 100 m strike-length of the host diorite and mineralizing pegmatites across a 50-100 m known thickness of diorite host. All 6 holes from the 2 pads located 100 m apart intersected significant uranium mineralization intervals greater than 300 ppm U. The best significant thickness intercept was 400 ppm U over 22.01 m (including 2171 ppm over 0.85 m), and a best individual sample interval returned 4978 ppm U over 0.55 m. The estimated true thickness of diorite host to the mineralized pegmatite varies from 45 m to 85 m, with mineralized pegmatites distributed throughout.

In all, a total of 158.13 true-thickness linear meters of significant intercepts were returned out of 604.29 meters of sampling, which amounts to a 26% return of anomalous meterage. These values are consistent with trench results obtained during the 2010 exploration program by Eagle Plains, and demonstrate that the Red October has good potential as a bulk tonnage uranium mining deposit.

The Company and Eagle Plains have entered into and have executed a Property Option Agreement whereby the Company has the right to acquire a 60% interest in the Eagle Lake Property. In order for the Company to earn a 60% interest in the Eagle Lake Property, the Company must, over a period of four years, make staged cash payments to Eagle Plains totalling \$300,000, carry out \$3,000,000 in aggregate exploration expenditures on the Eagle Lake Property, and must issue to Eagle Plains an aggregate of 1,000,000 common shares of the Company.

The 14,295 ha Eagle Lake Property consists of six mineral dispositions, located approximately 190 km north of La Ronge, Saskatchewan, and approximately 45 km southeast of the Key Lake Uranium Mine in Saskatchewan.

Technical aspects of this news release have been reviewed by Jarrod Brown, P.Geo., hereby identified as the “Qualified Person” under N.I. 43-101.
